Project Completed:May 2005

In January 2005, Sarpy County Nebraska contracted with Carlson West Povondra Architects and Chinn Planning, Inc. to program and design an expansion to the Sarpy County Sheriff's Department and Jail. The existing facility was overcrowded, and much of the program and support core space was inadequate to meet current and future inmate capacity. Chinn Planning, Inc. developed an operational and architectural program for a 104 bed expansion to the jail, which was comprised of two (40) bed dormitory housing units for minimum custody inmates, and one (24) bed single cell housing unit for medium security inmates. Program and support space was included in the housing unit expansion program. A detailed staffing plan for the housing unit expansion was also prepared. The recommended space program called for a housing addition of 28,000 gross square feet.

In addition to developing the space program for the 104 bed expansion to the jail component of the Justice Center, Chinn Planning, Inc. also developed a space program for expansion to the existing programmatic and administrative components of the Justice Center, including the kitchen, medical, jail and Sheriff's administration, visitation, facility support, inmate processing/intake, and hearing rooms.
