Project Completed May 2007

In September, 2006 the Nebraska State Building Division contracted with Carlson West Povondra Architects and Chinn Planning, Inc. to update the 1999 Office of Juvenile Services Facilities Master Plan, which was completed by the same firms. Specific requirements of the updated master plan included a review of substance abuse treatment needs, with particular focus on methamphetamine treatment needs. A review and assessment of services provided to juveniles at the Hasting Regional Center was included in the master plan update, in addition to the two Youth Rehabilitation and Treatment Centers at Kearney and Geneva that were included in the 1999 Facilities Master Plan.

**Girls Committed to YRTC Geneva
 Treatment Need Profile
 June to August, 2006**
